

Workshop Application Update

I am pleased to bring you news of the latest update to the Workshop Web Application.

The release deployed on the evening of 16th July included the following items:

Improved access to information from Wiring diagrams page – To help users locate wiring diagrams and additional information we now include links to Engine management, Air conditioning and ABS modules on the Wiring diagram page.

Translated update dashboard – Following on from the release of the English version a few weeks ago, the translated update dashboard now available in French, Spanish, German and Polish

Apply VAT/Tax on Estimate calculator – Each individual job and part can now be included or excluded from the tax calculation on the estimate calculator helping users create more accurate estimates to include additional items such as MOTs.

10 additional small bug fixes and enhancements – More bugs fixed to improve reliability and user experience.

Improved access to information from Wiring diagrams page

Total				86.00

Labour	159.00
Parts	86.00
VAT 20 %	40.00
Total	285.00

Full list of bug fixes & Minor enhancements

- Wrong translation on Estimate Calculator
- PHP error on Component Locations
- Scroll bar does not show fixed size window in Firefox or IE
- Sometimes the parts list in SG appears empty
- Disabled Engine code appears on revisit
- Manufacturer and model are not displaying under 'more' in recent activity
- When language is set to French, some text is in German
- #314: Issue with LDAP while linking Ecuador users with Spanish
- Using the new 'Change engine' option whilst looking at repair times is not loading the correct repair times.
- Recent activity failing for seamless/deeplinking users

Thank you and well done to everyone involved. **Nick Capek**
